Secure Key Ring

Affordable, Cost-Effective Plastic Cable Seal

The Secure Key Ring seals are very user-friendly and highly tamper evident. They can be applied to secure various applications for a range of security requirements.

The seals are secured as soon as the wire is clicked into place with the locking mechanism.

Secure Key Ring seals are versatile; beyond securing important keys, they are also widely used on containers, calibrators and valves across various industries.

Features

- 1 Molded with a high-impact ABS material with a galvanized steel wire rope and A3 Steel metal pin. The resilient ABS material does not break easily but will clearly show evidence of tampering.
- 2 One end of the is cable is permanently secured into the locking body, providing greater security.
- 3 The Secure Key Ring is etched with permanent laser marking for names, logos, sequential numbers and barcodes. Laser marking offers the highest level of security as it cannot be removed or placed.
