Strap Lock

Secure Application Seal

The Strap Lock can be paired with our cable lock MCLP 180 and MCL 250 to offer high, tamper-evident security.

The combination of the Strap Lock and the cable seals provides a neat and proper binding system for carton boxes with highly tamper-evident features that prevent pilferage.

Strapping bands cannot be removed and replaced without destroying the Strap Lock, and tampering/cutting evidence is easily detected.

Features

- 1 The Strap Lock consists of an aluminium plate to secure the interlocking of strapping bands on carton boxes and palletised cargo.
- 2 The Strap Lock seal is numbered with a pre-fixed serial number. The cable seal used with the Strap Lock can be marked with a corresponding serial number or a unique serial number if requested by customer. Text and logos can be added into the markings as well.
- 3 The corresponding laser marked serial number will be marked onto the Cable Seal.

Technical Specifications

PRODUCT

Product Code	Material	Cable Length	Cable Dimensions	Marking Area	Max Marking Digits
Strap Lock + MCLP 180_18	ABS body with galvanised steel wire rope	180mm	Ø 1.8 mm	19.0 x 12.0 mm	10
